Charles White Buried At Trochu Saturday

Funeral services for Charles White, who died Tuesday, April 18 at Elnora, were held Saturday in Trochu United Church. Pallbearers were H. Lammle, Swallowell; Mr. Kiever and Mr. Swan of Three Hills; G. Levins, E. Spry and S. Gouldie of Carbon.

Born in County Renfrew, Ont., 66 years ago, Mr. White came to Alberta in 1902 and homesteaded northwest of Carbon. He operated a livery stable at Three Hills and later moved to the Windermere district in B.C. For the past three summers he had been employed on the Ben Hongel farm of Swallowell.

Surviving are three sons, Edwin, Bridgewater, Ont., Fred and Gordon, Calgary; one daughter, Mrs. Eunice Martz, Delburne; 2 brothers, Tom and William, Carbon; two sisters, Mrs. P. McDonnell, Pincher Creek and Mrs. M. Wright, Port Angeles, Wash.

The Sunrise Gospel Hour Group of Calgary will be guests at special services in Carbon Baptist Church on Sunday, April 30. Morning services at 10 a.m. will be conducted by Mr. Bob Simpson, and evening services by Mr. Norman Jamieson. Services will include special vocal and instrumental numbers.

Hesketh and Sharples

Mr. and Mrs. Bert McCracken have moved to their farm north of Carbon.

Mr. and Mrs. Robertson and family of Dunphy have taken up residence at Sharples, where Mr. Robertson will operate the P & H elevator.

The Grand Forks Athletic Association held a meeting at Garrett school last week. It was decided to hold the sports on Wednesday, July 5. An attempt will be made to form a ball league again this year. Playground equipment, including swings and teeter totters, will be erected at the ball grounds in the near future. A clean-up day will be held at the diamond on Sunday, April 30.

PO Stanley King of Dartmouth, N.S., and Mrs. King and family, recently sailed for England on the Empress of France. PO King will take a 14-month naval course at London and Plymouth.

Mr. and Mrs. Aaron Klassen of Calgary were weekend visitors in Carbon.

"Come on, 'Ma', let's play Bingo Saturday night." The Legion is putting on this entertainment for your enjoyment and to supplement its building fund. Support the Legion—play Bingo and have fun. First Bingo night, Saturday, April 29.

The Red Cross campaign recently completed in Carbon exceeded the \$800 objective set by the local branch, with slightly over \$850 being donated by citizens of town and district. Following is a partial list of donations: East Carbon Coal Co. Ltd. \$25, R. Garrett \$25, A. Holvik \$20, E. D. McKellar \$20, S. F. Torrance \$15, R.D. Barnes \$15, C. H. Nash & Son \$15, Len Poxon \$15. Further list next week.

Soap Box Derby

VANCOUVER. — B.C.'s Soap Box Derby will be held June 5. The date was announced by J. A. Gunn of Mission City, B.C. chairman, as preparations for the first all-B.C. derby pushed ahead.

To Enlarge Rink

SALTCOATS, Sask. — The Saltcoats Curling Club plans to start at once on its building project. The idea is to build an additional two sheets of curling ice on the East side of the rink. This will give the club four regular sheets of curling ice instead of two as at present.

May Day Queen

SALMON ARM, B.C. — Setsuko Konishi, Japanese-Canadian student at the consolidated high school here, will be queen of the annual May Day celebration here May 24. She was chosen in a student election.

Gets Pro Berth

REGINA. — Mike Dzenkowski, a left-handed pitcher from Kelstern, Sask., has signed to play Class C professional baseball with Fort Madison, Wis. The club is managed by Benny Meyers.

Dog Gone Dogs

INDIAN HEAD, Sask. — Indian Head is looking for a Pied Piper to rid the town of a surplus of dogs, for it is a case of "Dogs to the left of 'em, dogs to the right of 'em and dogs all round 'em" according to harassed motorists and pedestrians. All dogs will have to be properly registered and tagged, otherwise they will be transported to the dog's happy hunting ground. The town council are advertising for a dog catcher to carry out this task.

A good example is the best sermon.

WHY SUFFER PILES

Grateful users praise quick results. Relief from Pain—and soothing comfort—from Mecca Pile Remedies. Two kinds—Number 1 for protruding Piles. Sold in tube with perforated pipe for internal application. 75c. Number 2 for external Piles. Sold in Jar, 75c. Order by number from your Druggist.

MECCA PILE REMEDIES

Here's Prompt Relief Beyond Belief From The Pains Of

ARTHRITIS RHEUMATISM

Try prompt-acting, easy-to-take DOLCIN Tablets . . . now available in three convenient size bottles, at reasonable cost, at all drug stores. Acclaimed by relieved sufferers everywhere, you can rely on this effective product to relieve the agony of Arthritis, Rheumatism and Sciatica. DOLCIN is prompt and has no unpleasant after-effects. Get a bottle of genuine DOLCIN Tablets and let them help you find new, comforting relief . . . today! 100 tablets for \$2.99—200 tablets for \$5.95—also available in bottles of 500 tablets. Dolcin Limited, Toronto 10, Ontario.

B.A. Oil Shares —Interesting—

Success of the recent issue of B.A. Oil Common Shares is further evidence of the attractiveness of this old-established Company's securities. Current dividend rate on the Common Shares is \$1.00 per share payable quarterly and the current market around \$26½ per share.

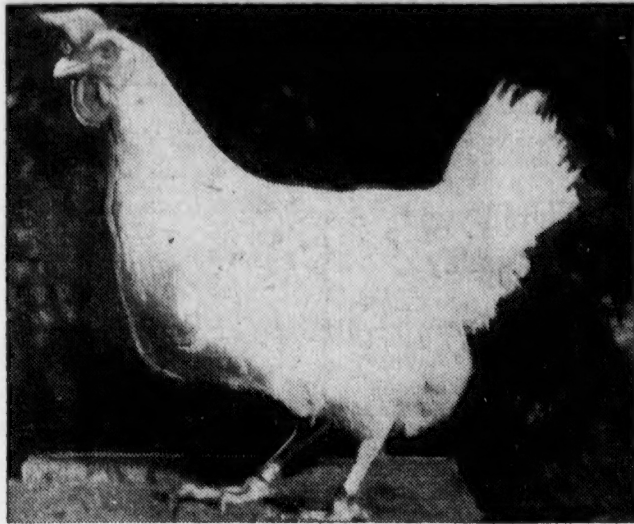

Known for its quality products throughout Canada, the Company is also actively engaged in exploration and development of oil properties both in Alberta and in the United States where its wholly-owned subsidiary has 488 producing wells in ten States including Texas, Oklahoma and California.

Earnings of the Company during the current year are reported very satisfactory and current outlook continues highly promising.

The interesting story of B.A. Oil is told in the prospectus, a copy of which we will send you freely upon request.

GOOD RECORD—One of the good White Leghorns at the Dominion Experimental Station, Kentville, N.S., with a production record of 1,186 eggs.

FUNNY And OTHERWISE

They had not met for some time. "And you say that last week you were in the town where I live?" she murmured.

"Yes." "And you thought of me, John?" "Ay, I did," replied John. "I said to myself, 'Why, isn't that where what's-her-name lives?'"

"Johnny," said his mother, "someone has taken a big piece of gingercake out of the pantry." Johnny blushed guiltily. "Oh, Johnny, I didn't think it was in you!"

"It ain't all," replied Johnny. "Part of it's in Elsie."

They were discussing a friend. "Brown is a good fellow, really," said one, "but he treats his poor wife miserably."

"What do you mean?" the other asked. "Does he beat her?" "No, no! He just refuses to argue with her."

Barber: "Shocking hard times, sir."

Customer: "They don't affect you much I suppose?"

Barber: "Oh, yes sir. When people have such long faces it costs ever so much more for soap and lather."

He appeared before the company officer, charged with using insulting language to his sergeant.

"Please, sir," he protested, "I was only answering a question."

"What question?" snapped the officer.

"Well, sir, the sergeant said, 'What do you think I am?' and I told him."

The estate agent was showing Bodger over the house. "Isn't this rather a poor district?" asked Bodger.

"Certainly not," replied the agent. "You will find that your neighbours never borrow less than five dollars."

The weaker sex is the stronger sex because of the weakness of the stronger sex for the weaker sex.

R.C.M.P. Boat On Epic Voyage

ESQUIMALT, B.C. — The tiny Royal Canadian Mounted Police patrol vessel St. Roch of Arctic fame is on a history-making voyage around North America.

The St. Roch, which had twice sailed through treacherous iceberg-infested Arctic waters, left the navy's west coast base recently for Halifax, N.S., via the Panama canal. When the sturdy little police schooner ends her voyage in June, she will have become the first vessel ever to completely circle the North American continent.

Aboard will be third mate Sgt. Fred S. Farrar, who will share honors with the St. Roch in being the first man in history to sail right around North America.

Saskatoon To Be Included On Main North-South Road

REGINA. — Saskatoon will be included on the route to be hard-surfaced as the province's main north-south highway, Highways Minister J. T. Douglas revealed in the legislature during consideration of highways department estimates.

Asked by Jacob Benson (CCF—Last Mountain) to announce the government's decision on the main north-south route, Mr. Douglas said it would link up Regina, Moose Jaw, Saskatoon and Prince Albert.

When the telephone first was being developed by Alexander Graham Bell, it was known as the "harmonic telegraph". 2877

Tired Aching Tender Feet

Your feet may be so tender and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture; you'd give anything to get relief. Two or three applications of Moore's Emerald Oil after a good hot foot bath and in 15 minutes the pain and soreness disappears. No matter how discouraged you have been, if you have not tried Emerald Oil, then you have something to learn. Get a bottle today at any good drug store — anywhere.

MEADOW LAKE MAN RECEIVES MEDAL OF MERIT FROM POPE PIUS

MEADOW LAKE, Sask. — Leon Sergeant, a pioneer of the district since 1908, has received a gold "Bene Merenti" — medal of merit — from Pope Pius XII. The medal is shown in recognition of services rendered by him to Roman Catholic missionaries.

Some 2,000 species of woodrotting organisms are known.

TWO MORE DRIVE-IN THEATRES FOR EDMONTON

EDMONTON. — Not one, but two more \$150,000 drive-in theatres are scheduled for here, according to Western Drive-in Theatre's President Mervyn Dutton of Calgary. The first was in operation last year. Now the intention is to start building two more as soon as ground conditions permit.

The number of molecules in one cubic inch of air is 43 sextillion.

FESTIVE—quick to fix! with Modern Fast-Acting DRY Yeast!

FAN TANS

Measure into large bowl, ¼ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle slowly with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min., THEN stir well.

Scald 1 c. milk and stir in 5 tbs. granulated sugar, 2 tps. salt; cool to lukewarm. Add to yeast mixture and stir in ½ cup lukewarm water. Beat in 3 c. once-sifted bread flour; beat well. Beat in 4 tbs. melted shortening. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl and brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough in bowl, grease top and let rise again until nearly doubled. Punch down dough and roll out, half at a time, into a rectangle a scant ¼" thick; lift dough, cover with cloth and let rest 5 min. Brush with melted butter or shortening; cut into strips ½" wide. Pile 7 strips together; cut into ½" pieces. Place cut-side up in greased muffin pans; separate slices a little at top. Cover and let rise until doubled in bulk. Bake in hot oven, 400°, 15-20 min.

Always running short of yeast because it spoils so quickly? End this nuisance — switch to modern Fleischmann's Fast DRY Yeast! Keeps full strength and fast-acting right in your cupboard — no refrigeration! No new recipes — one package equals one cake perishable yeast in any recipe.

Your Future Hangs On The Dairy Cow

The Department of Agriculture, in its desire to promote a better use of food as well as a better use of land, is resuming through its Consumers' Section and other departmental agencies, former peacetime activities in getting Canadian people better acquainted with home produced foods.

During the next two months, dairy products, which logically form part of a national program of conservation—from soils to men—will be featured throughout the country. Here are a few facts which any producer or consumer should keep in mind:—

(1) Dairy products are basic products; in any health program, in any daily diet, they command priority, whether it be for children or adults.

(2) Dairy industry in Canada is perhaps the best guarantee of stability for the large majority of our farming population—the cow is the home market for grasses and grasses are a "must" in soil conservation.

(3) Canadians are inclined to take for granted the abundance of our dairy products and use them loosely whereas we should take advantage of those abundant supplies to bring our diet into a better balance and improve our standard of living.

(4) For the same amount of money, the consumer cannot get the same essentials from other foods as those supplied by dairy products—calories in butter and protein in milk are cheaper than in most other farm products.

(5) Butter itself takes almost half of our milk production and constitutes one of the best channels—in some cases the only channel—through which milk produced from small farms located far from consuming centres can be marketed.

(6) Cheese is a high protein food, the consumption of which could be increased if our population had a better knowledge of this product—our average consumption is 4 to 5 pounds a year whereas it is between 15 and 20 pounds in such countries as Denmark and Switzerland.

These are only a few among many reasons which justify the Department fostering a movement for a more thorough knowledge of dairy products on the part of the consumers as well as of the producers themselves.

YOU'RE TELLING ME

By
WILLIAM RITT
Central Press
Canadian Writer

Earthworms, according to Factographs, can live to the ripe old age of 10 years. Provided, of course, they never go fishing.

In China there's a Foochow and a Soohow and, according to Grandpappy Jenkins, who hates chop suey, bad chow.

Atomic explosions, we read, may slow down the earth. Oh, no! It's too long now between pay days!

Astronomers, commenting on reports of a flying saucer sighted above Mexico, say it was probably just the planet Venus. Imagine that glamorous Evening Star being mistaken for just a piece of perambulating crockery!

And until we see a photograph of him, that 23-inch-tall flying saucer pilot, also reported seen below the border, must remain just another "little man who wasn't there."

Many a man never outgrows his love for the fairy tale books of his childhood. This, says the man at the next desk, may explain why some of us just love to pore over spring seed catalogues.

A boa constrictor in a pet shop has given birth to a "litter" of 30 babies. By the time they get their full growth it's going to be a tight squeeze!

ASK YOUR DOCTOR

Your family doctor is best qualified to tell you whether or not you are in good physical condition. If he is able to check you over thoroughly at least once a year, he'll be able to keep you in trim more easily. Regular medical check-ups often detect serious illnesses.

Featured For Spring Parade

Let your sleeves guide your gloves is a good fashion rule. And just right for this after-five frock are the bracelet-length washable doeskin gloves matching the sophisticated white turban. Navy silk braid touches up the collar, cuffs and pocket of this charming suit of checked wool. Jacket fits snugly and bias-cut skirt falls with an easy grace.—Central Press Canadian.

Health Hints

Here's a hint on toenail care—cut them straight across and not shorter than the flesh. Also, don't be a "bathroom surgeon" when it comes to ingrown toenails—consult a qualified chiropodist.

It is a nutritional mistake to use baking soda to preserve the fresh color of vegetables during cooking—ordinary heating with baking soda destroys the vitamin C content completely.

The liquid surrounding the solid vegetables in a can is useful nutritionally. It contains dissolved minerals and vitamins and should be used.

Health, breath and appearance are affected by a neglected mouth. Gums should be massaged as the teeth are brushed, while dental floss should be used to loosen food particles from between the teeth. Also, regular visits to the dentist are a necessity.

Vitamin A which promotes growth, builds resistance to infection by keeping the lining tissues of the body organs in healthy condition, and is necessary for correct functioning of the eyes, is found in liver, fish oils, yellow and green vegetables, milk, cream, butter, egg yolk, green and red peppers.

Poor lighting has a tiring effect—in fact, the worker who spends his day using his eyes under poor lighting may be more tired when evening arrives than one who devoted his day to outdoor manual labor.

TRY AND STOP ME!

By BENNETT CERF

A wealthy, impatient executive decided to take a course of golf lessons. On his first trip to the practice tee he told the pro, "I'm a busy man, so don't string this thing out the way I suppose you do for ordinary customers. You give me everything in one half-hour lesson and I'll pay you for the whole course!"

A customer charged into a tailor shop and announced angrily, "Four days ago you sold me a suit for sixty-five dollars, and now there's nothing left of it." The tailor answered, "And what do you think is left of the sixty-five dollars?"

STRONGEST POST

Strongest of all the posts of the Hudson Bay company was Prince of Wales fort built in 1732 at the mouth of the Churchill river.

Huddersfield Ministers Coming to Canada

Two Congregational Ministers, the Rev. Arthur Packman, and the Rev. John Probyn Travis, are to leave the Huddersfield district in April to take up appointments with the United Church in Canada; Mr. Packman expects to settle somewhere in Ontario, while Mr. Travis will go to New Brunswick.

Omar Khayyam's poetry is probably more widely read than any other.

On The Side —By— E. V. Durling

There are still quite a few places in the world where it is easy to get a husband. One is Israel, where it is reported there is a shortage of about 20,000 women of marriageable age. The marriageable males in Israel are between the ages of 15 and 34. It is said that when a good-looking bachelorette arrives in Israel she is immediately bombarded with proposals of marriage by hundreds of eager bachelors.

REASON FOR DOUBT

It has been claimed that during the Victorian period in England many women had 17½-inch waists. Doris Langley Moore, fashion expert, who has made a study of the period, doubts this claim. Mrs. Moore has a collection of over 600 gowns and the smallest waistline among them is 22½ inches.

Have you a bachelorette daughter? What is her idea of an ideal husband? Recently, in South Africa, a prize was offered bachelorettes for the best description of an ideal or "dream husband". The winner, a 16-year-old bachelorette named Jacoba Oppermann, said her ideal husband was "a man who often shows affection for his wife by a quick kiss or passionate hug. One who helps bring up the children, has a joint banking account, throws impromptu parties, bears no grudges and listens to his wife's point of view before making a decision."

PERFECT FIGURE

A group of enthusiastic admirers of feminine pulchritude has named Patricia Reid to be "the perfect woman". They think Patricia is "perfect" because she has plenty of curves and they are all natural. Her figure does not need any artificial build-up anywhere. The measurements of Miss Reid, who is a blue-eyed redhead, are: bust, 35 inches; waist, 23 inches; hips, 34 inches.

PSYCHOLOGICAL BARBERING

Now there is a tonsorialist who calls himself "a psychological barber". He is Michael Collin, of London. Before giving a customer a haircut he makes a complete study of his personality. Then he matches the haircut to the personality. This takes more than one sitting. Each customer has a chart on which is noted the progress he is making toward having the right hair style for him. Each sitting takes two hours. The price of a single haircut is \$2. This may sound silly, but Mike, the "psychological barber", is a London sensation. He started alone; now he has six assistants.

FASHION ADVICE

Note it reported the Paris styled dictators have ruled that short-skirted evening gowns and wedding gowns will be the fashion. If our feminine friends fall for that I think they will be making a great mistake. Not one woman in 10 looks well in a short-skirted evening gown. As for a short-skirted wedding gown, it just doesn't seem in keeping with the occasion.

CONCERT FOR COWS

As her cows go in for milking, Nora Johnson, Surrey, Eng., farmer, entertains them with a short concert on a portable piano. This musical innovation has greatly increased the milk yield of Mrs. Johnson's cows. A few years ago there was a horse running around the New York tracks whose victories were greatly increased when he was entertained nightly with a recording program. This horse preferred crooners and string quartets. He had never won a race until the idea of adding music to his training schedule was introduced.

DUTY SMACKS

It was Margaret Barron who said: "There are kisses that flatter, kisses that soothe, kisses that thrill, kisses that amuse, kisses that pay homage and plain duty smacks." Ladies seem very bitter as to that occasion they class as "duty smacks". After that they seem most to dislike to be kissed by a man who has neglected to shave.

(By Francis James)

Dear Miss James:

I would appreciate some advice about decorating the living room of the house we have just bought.

The outside of the house shows the Spanish influence, and for this reason, I suppose, the present owner has chosen what I consider a very stark decor—she has the living room walls painted plain white, the woodwork dark and touches of bright red scattered all over the room. I don't care for this at all. I much prefer pastel shades and a soft warm look. What would you advise for a colour scheme—for this room and for the large recess which opens off it, and which we are going to use as a dining room?

On either side of the living room fireplace there is a built-in niche which used to be a window. Another thing—I have some good pictures but they are all small. Do you think small pictures look out of place in good-sized rooms?—Mrs. T. C.

Dear Mrs. T. C.:

I don't blame you for wanting to change the decor.

To my mind, warmth and comfort are just as essential to good decoration as drama, particularly in a much-used room.

First, your woodwork. I would paint the woodwork in both rooms a warm ivory. Since you want to get away from the stark look, you want wallpaper for your walls. For the living room I'd suggest a paper in peach-pink and ivory stripes—there are some lovely ones with a soft

satiny finish—and for the ceiling a plain ivory paper. I think you could make the two built-in niches very interesting—why not paper them in a mural design with a background of, say, a darker but harmonizing pink or burgundy (not candy pink), paint the ledges ivory and place some of those charming little green Chinese figures along the ledges.

To get the note of pastel warmth you want, be sure you keep your lighting shaded—glaring lights are the quickest way to ruin such an effect. Opaque lamp shades are good this season—green, pink or burgundy would be attractive in your room. Chinese lamps and vases would be very appealing too.

For your rug I would suggest ivory, peach or mushroom—or possibly a very pale green. Furniture upholstery and other colour notes could be yellow or burgundy.

Now for the dining recess—I'd have ivory ceiling paper here too, and for the walls a sea blue paper, plain or with an inconspicuous design. The two rooms—one in sea blue, the other in peach and ivory—should complement each other very nicely. Colour accents in this room could be dull red and yellow.

I certainly would make use of the small pictures—they are very effective arranged in groups over, for instance, a chesterfield. And by a group I don't necessarily mean three or four—I saw a very striking room the other day where at least twenty small pictures were grouped over a fireplace with excellent results.

AM I ANNOYING YOU?

—Morris, in The Rochester & Chronicle.

FIND REMAINS OF ANCIENT SHIP, MAY BE SPANISH ARMADA GALLEON—Royal Navy has reported "We have discovered remains of a wooden ship and we are working on the hulk." Replica of famous Golden Hind, Sir Francis Drake's ship, is shown. Ancient hulk located in Tobermory Bay may be the fabulous \$93,000,000 Spanish galleon, Duque de Florencia, reported to have been blown up after Sir Francis Drake defeated Spanish armada. Excitement at Tobermory, off Scotland, is at a peak as Royal Navy plans new dives to try and locate Spanish treasure galleon. Diver is shown coming to the surface.—S.N.S. photo.

NEW HAY KING—Douglas Hart, Woodstock, Ont., the new Ontario hay king, receives the J. S. McLean Trophy for championship entries in the Ontario Hay Show at Woodstock from A. H. Martin, Crops Branch director, Toronto.

ASKS ACCEPTANCE OF WESTERN GERMANY—John J. McCloy, (above), U.S. high commissioner for Germany, recently sounded the call to Western Europe to accept Western Germany as a full partner in the campaign to stop Russia. McCloy recently returned from high level consultations in Washington. His words obviously were approved by President Truman and U.S. Secretary of State Dean Acheson. They followed other recent appeals by Britain's Winston Churchill and France's Gen. Charles de Gaulle to their own governments.—S.N.S. photo.

BECOMES CHIEF AGAIN—Lockhart W. Trinnell, 55, who in 1939 retired from the Toronto police force after 25 years' service, will "get back into harness" as police chief of Pickering township, May 1. The former Toronto police force detective and founder of the first Toronto arson squad said: "It's time, too, I feel I can be of service to the township and am all set to roll up my sleeves and go to work."—S.N.S. photo.

N.D.C. MEMBERS GATHER—Close to 200 members of the National Dairy Council gathered at the picturesque Seignior Club, near Ottawa, for their annual meeting. Every session of the three-day gathering, with the exception of the luncheon speeches, brought in margarine and the threat it presents to the whole dairy industry. Shown above, Prof. Gordon L. Burton, of Macdonald College tells the dairymen they should be able to reduce the price of milk to consumers. Left to right: Lyle Atkinson, J. S. Turnbull, and E. G. Silverwood.

CHUMMY—Two-year-old Kenneth Stencil of Massey, Ont., seems quite pleased to get a kiss from his pet deer "Flag". He treats Flag every afternoon to a dish of apples and peanuts. They have lots of fun together.

SEEK NEW AIR GLOBAL RECORD—Robert Bixby and his wife, Dianna Cyrus Bixby, are shown climbing aboard their twin-engine plane at San Francisco recently to begin their attempt to better the 73-hour record made by the late Bill Odom for round-the-world flight. They piloted a converted British Mosquito bomber. The route they charted covers over 21,000 miles.—S.N.S. photo.

GEMS STOLEN—Six hours after \$18,000 in jewellery was stolen from the home of Mrs. Estelle Giddings, near Oakville, Ont., the jewels were carefully returned and placed between the outside screen door and the main entrance. The thief, who walked off with the jewels while the house was full of strangers attending a sale of household furnishings, rang the bell, threw the jewels between the doors and fled. Mrs. Giddings, (above), said.—S.N.S. photo.

BRING YOUR OWN BOTTLE—The congregation of the blitzed church of St. Mary's-in-the-Boltons, Kensington, London, were invited to bring their hot water bottles with them to services so that they could worship in comfort. The Reverend John Nickels offered to fill up any empty bottles with water boiled on portable stoves in his vestry. The church is so badly damaged that it gets very chilly. This picture shows the Verger filling up the hot water bottles before evening service.

EXECUTIVE MEETS—The recent meeting of the executive of the Ontario Poultry Producers' Association in Toronto, instructed Kenneth Betzner, Waterloo, president; R. S. Heatherington, Campbellville, vice-president; and V. S. Milburn, Toronto, secretary, to interview the Ontario minister of agriculture and members of the Ontario farm products marketing board to discuss a tentative marketing scheme for egg and poultry products. Left to right (back row): William Sutcliffe, Holland Centre; Tom Robson, Leamington; Donald Paul, Napanee; V. S. Milburn, Toronto, secretary of the Ontario Federation of Agriculture and secretary of the new organization. Front row: R. S. Heatherington, Campbellville; K. M. Betzner, Waterloo; and William Legault, Moose Creek. Other member of the executive, but not present at the executive meeting, is C. H. Luckman, St. Williams.

Elevators To Solve Car Parking

By JEROME DREYER
(Central Press Canadian
Correspondent)

A hot topic these days among municipal authorities is the slow strangulation of business that is taking place because of the inadequacy of parking facilities for shoppers.

In New York city alone, property valuations in the downtown business area have dropped a billion dollars in the last 15 years—about 4 times the combined loss of the Chicago fire and the San Francisco earthquake.

Several plans have been suggested to alleviate the situation, but at the moment the one that interests them most has been proposed by William Zeckendorf, 44-year-old New York real estate dealer who found a home for the United Nations.

Describing the parking problem, Zeckendorf says:

"We stack people horizontally in garages and lots. This archaic approach is largely responsible for the current mess. Property in the business areas is so expensive that operators of parking lots, to break even, must charge as much for a car as a moderate-priced hotel asks for a room."

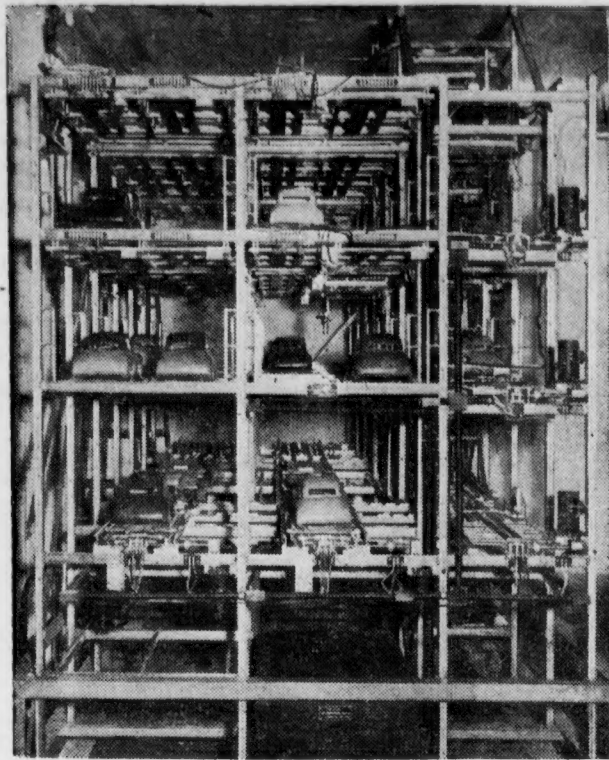

Despite the 10,000 garages and parking lots in New York city, traffic tie-ups are of such proportions that they discourage suburbanites who might want to shop in the city.

What is the answer, then?

"Simple," replies Zeckendorf. "Build skyscraper garages in which cars are whisked away automatically and returned within a few minutes. You should be able to lock your car and have it carried 10 stories above the street by pressing a button and get it back by pressing another button."

How this will work is demonstrated in a model of the Zeckendorf automatic parking garage, the first experimental step, built at a cost of \$250,000 over a three-year period. Certain civic authorities who have seen it in operation are so enthusiastic about it they already are talking of municipal subsidies to launch it full scale.

Salient feature of the garage is a vertical conveyor with built-in dollies. At the entrance, the car is driven on to a dolly on which it will rest all the time it is in the garage. The driver drops coin, the pre-set minimum charge, in the slot and re-

Cutaway Section of Zeckendorf's Automatic, Multiple-story Garage.

ceives a perforated token for reclaiming his car later.

The car, locked on the dolly, is carried across the garage a few inches above the floor to an elevator, which hoists car to preassigned parking level.

Moved off elevator on rollers, an overhead crane drops a frame over the car, picks up dolly and carries both over heads of other parked cars to vacant stall. The frame lowers the car into a vacant spot and automatically detaches itself.

When the customer calls for the car, he drops his token into a slot at exit station and same system of conveyors brings the car to him by way of the exit elevator.

The designers claim that the automatic parking garage, occupying ground space of 100 feet by 200 feet, with only 10 levels, can handle up to 3,940 cars daily.

Earliest reference to cigarettes has them smoked in France and Italy in 1842 and 1843.

60 Front Street W., Toronto.

The size of the original Mona Lisa painting is 2 feet 6 inches high by 1 foot 9 inches across. 2877

KITCHEN MEDITATIONS

HAPPY BIRTHDAY TO YOU!

By JANE DALE

When the merry voices sing at that special time
Happy birthday to you! Happy birthday to you!
It gives your soul a lift and warms anew your heart,
Thrilling you through and through. It is nice to be remembered as the years go by
With a Happy birthday! Happy birthday to you!
By friends with cares and troubles of their own
But remain loyal and true. There's no gift to compare to the greeting of a friend:
Happy birthday to you! Happy birthday to you!
And the gentle reminiscing of many years gone by
Will a kindred love renew.

WATER CONSERVATION

LETHBRIDGE, Alta.—Robert A. Bryce of Toronto, president of the Canadian Chamber of Commerce, announced here that the chamber was establishing a new committee to coordinate all organizations working toward the conservation and development of Canada's water resources.

Weekly Tip

CURLY MATS

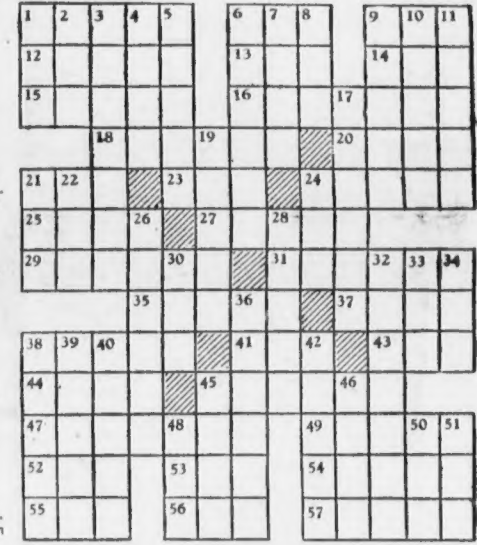

"How do you make the corners of mats and rugs lie flat when the edges get worn and curl up?"

Sew weights in the corners; strip adhesive on the underside of the mat; bind the mat on the corners with a bias fold running corner to corner.

Shopping Spree To Equip U.N.'s 39-Story Secretariat

By JOHN GOETTE
(Central Press Canadian Correspondent)

NEW YORK.—The envy of every ardent Canadian woman shopper is the director of the purchase division of the United Nations. He is looking for \$2,000,000 worth of bargains, ranging from steel desks to fine carpets and decorative woodwork.

These widely assorted items are needed to furnish the 39-storey Secretariat building soon to be completed on the East River site of the U.N.'s permanent headquarters in New York City.

The equivalent of 20 acres in office space must be outfitted in this 31st among Manhattan's tallest skyscrapers. Constructed at a cost of \$24,000,000, it is the first of four units planned to house the U.N. organizations.

Contracts have now been let for the second unit, a \$12,000,000 meeting area with chambers for the three main councils.

The purchasing division is going on its gigantic buying spree in international fashion. All 59 member nations were polled to see which could supply what.

Thirty-seven replied expectantly. Only five had nothing to offer. Of the Big Five powers, France, Britain, China and the United States were eager to sell, but the fifth, Soviet Russia, gave no response.

Discussing the problem of furnishing the new U.N. home, Secretary General Trygve Lie said: "It is my hope and expectation that the decoration of the U.N. headquarters will represent the finest and most beautiful examples of the art of all peoples."

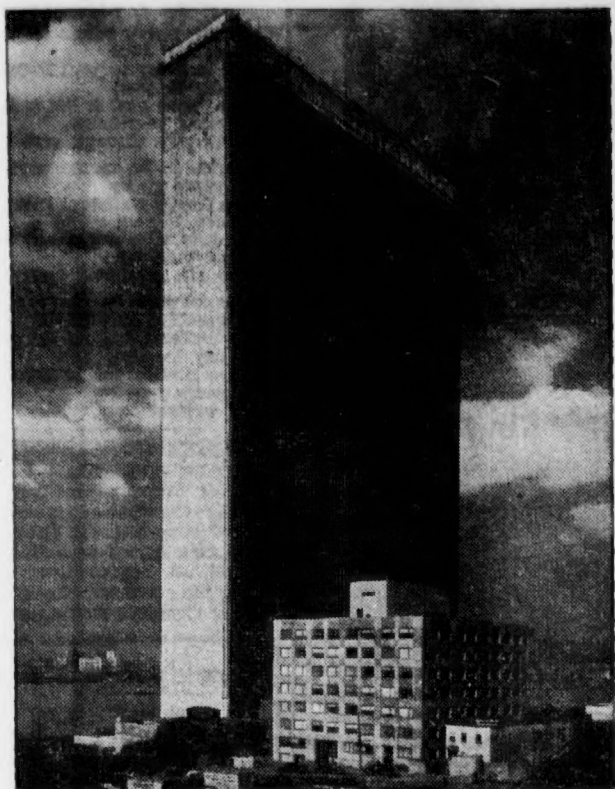

"To achieve this result is by no means an easy task. It requires tact and judgment as well as taste and artistic skill to make the requisite decisions."

An American, Wallace Harrison, presides over the vast purchasing venture as director of planning.

The complete scheme of the U.N. permanent headquarters is based on the interest-free loan of \$65,000,000 made by the United States government.

Furnishings sought at present must be adapted to the unique architectural nature of the 544-foot tall Secretariat building, which is all windows on the east and west sides, and solid walls of Vermont marble on the north and south.

The 5,400 separate windows would cover six full acres, while 2,000 tons

United Nations Secretariat Building in New York. It's 39 stories high.

of white Vermont marble went into the unbroken north and south facades.

President Truman attended the laying of the cornerstone of the Secretariat building last autumn, but it will be the spring of 1951 before the 3,000 staff of the U.N. can shift entirely from its present temporary headquarters at nearby Lake Success on Long Island.

When it gets into its real home, the U.N. will save \$202,831 yearly rent on the make-shift establishment located in a former wartime airplane plant.

In the words of Chief Planner Wallace K. Harrison, the six block international enclave running between the East river and First Ave. and from East 42nd St. to East 48th St., is dedicated as a "Workshop for World Peace".

However, in the quest for \$2,000,000 worth of furnishings, conflicting national tastes and commercial competition raise their heads.

When the Board of Art disagrees, the argument goes to a top level Headquarters Advisory Board to restore the peace for which the United Nations organization stands.

British Firms To Exhibit At Prairie Fairs

Firms in Nottingham, Northampton and Leicester, England, making boots, shoes, toys, lathes and underwear, will show their products to 100,000 Canadian farmers at five Prairie Fairs this year. Arrangements have been made by Mr. W. G. Coventry, United Kingdom Trade Commissioner in Winnipeg.

British exhibits in Brandon, Calgary, Edmonton, Saskatoon, and Regina between July 3rd and August 5th will include textiles, clothing, hardware, cutlery, leather goods, pottery, small machinery, bicycles, motorcycles, food specialties, toys, office equipment, chemicals, including antiseptics and other goods.

Mr. Coventry recently drew the attention of North Midland industrialists to the value of the Prairie Fairs as a superb shop window in which to show goods likely to attract the prairie farmer and his family.

The vast acres of ripening grain which wave in the prairie breeze as far as the eye can see are a constant reminder to the Canadian farmer that by buying British goods they can assure themselves of a continuing market for their grain, the more so as the Anglo-Canadian wheat agreement ends on July 31st of this year.

Man Quits Living In Sealed Automobile

FORT SMITH, Ark. — Don Haynes of Ashland, Ore., had himself sawed out of a sealed automobile, where he says he has been living for 13 months and 18 days.

Haynes said he bet E. B. Mulden, also of Ashland, \$25,000 that he could remain in the sealed automobile for 14 months.

He said he decided to give up because he had lost contact with his publicity man.

Haynes had been traveling about the country in his especially-equipped automobile. He has appeared under auspices of automobile dealers and others in promotion and advertising schemes. He said he's "looking for a job" now.

A survey estimates the greatest personal fortune in the world belongs to industrialist Pierre Dupont—\$3 1/2 billions plus!

Garden Notes

Water Well When Transplanting

In moving plants from one location to another, whether it is a tiny flower from pot or flat, or a ten-foot maple tree, the same rules apply. The main thing is to guard against the roots getting dried out. Keep them moist and expose to the air as little as possible. All plants should be set in the earth a little deeper each time moved. Soil, which should be as rich and fine as possible, is pressed firmly about the roots. If at all possible water well soon after transplanting, and in the case of big shrubs or trees keep the soil moist for a few weeks. With small things like bedding plants a little shade for the first few days will help, and if possible do the transplanting in the evening or on a cloudy day. Young trees should be staked to permit roots to get firmly established.

Don't Let Them Stand Still

Quick, unchecked growth is the real secret of tender vegetables and it is possible to grow them quickly anywhere in Canada if just a little care is given.

In the first place one must have good seed and of varieties that are suitable to local conditions. Next, the vegetable garden should be thoroughly cultivated or dug, then the seed planted according to directions on the packet. Spacing is important as crowded plants never have a chance to develop quickly. Cultivation once a week will usually be sufficient itself to keep growth coming along even in the driest weather. If a hose is available, however, that will be another safeguard. A little chemical fertilizer applied carefully and according to directions is also advisable.

No Hurry

One can dig or cultivate soil too soon in the spring or too soon after a heavy shower. If stirred up while still really wet, heavy soil is liable to bake into lumps as hard as brick. And it doesn't do a bit of good, and it may cause some harm, to cultivate even light loam while it is wet.

Technical people have various scientific tests for determining whether it is safe to cultivate, but the old gardener simply takes a walk around. If the soil is muddy and sticks to his boots then he finds other jobs indoors. But if the soil is damp but doesn't squeeze tightly together it is just right to cultivate. And this rule holds good whether the winter snows have just gone or after a heavy summer shower.

A light heart lives long.

Cooling Tank For Milk

PROPER means of cooling milk are essential to the production of a first class product. It is desirable that milk be cooled quickly for best results, then kept cool until shipment. The health inspection services of most cities ask for the storage of 2 1/2 to 3 tons of ice per cow where ordinary methods of milk cooling are used. It should be of particular interest to dairy farmers, therefore that with a properly insulated cooling tank a little more than a ton of ice is sufficient to cool 33 lbs. of milk per day during the six warm months of the year, all the cooling to be done with the ice. This takes care of 6,000 lbs. of milk during the six months mentioned, which is considerably more than the average dairy cow will give during this period of time.

It would seem logical to ask, therefore, why put up 2 1/2 tons of ice per cow when 1 1/4 tons will do? In an ordinary concrete tank about half of the ice put into it is wasted cooling the soil and air around the tank. If a tank is properly insulated, however, this loss is reduced to a comparatively small amount. Freshly drawn milk has a temperature of about 98 degrees Fahrenheit, and for best results it should be cooled to 50 degrees, or less, within two hours after milking. To extract the heat from a given quantity of warm milk it requires a definite amount of refrigeration, or stored cold, to absorb the heat. This refrigeration is supplied either by melting ice or by a refrigeration machine, usually driven by electricity. Recent studies of this problem have shown that to cool 100 lbs. of milk to a temperature of 48 degrees in two hours takes 1.2 kilowatt hours of electricity or 40 lbs. of ice. Insulated tanks, of course, are essential not only for economical cooling but also to secure the degree of cooling necessary for a first-class product.

The size of the tank needed will depend on the number of 8-gallon cans to be cooled at one time, plus the necessary cooling water and ice. To obtain the necessary capacity of refrigeration storage in the form of ice water there should be three times as much water in the tank as there is milk in the cans.

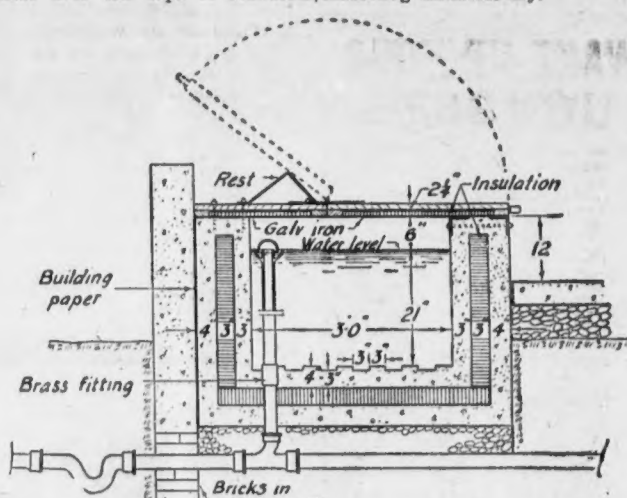

The tank should not be deeper than necessary to permit the cover to close over the tops of standard

cans, as excessive depths only add to the labor of lifting the cans out, and the depth of water need not be greater than sufficient to reach the necks of the cans. The accompanying table gives the dimensions of several convenient sizes of tanks for different sizes of dairy units. It should be noted that a standard inside width of 3 ft. and a depth of 27 inches is used in all sizes, the variation being in the length only.

The important thing in the construction of an insulated tank of this kind is, of course, the insulating material. A great deal of research work has gone into the development of the best forms of prepared insulation for this kind of milk-cooling tank. Not less than 3 inches of the material is advisable, and it should be made up either of compressed cork sheeting such as is used in the construction of refrigerators, or of any of the wood pulp insulating boards now on the market. Several firms interested in the insulating material trade are preparing hermetically sealed sheets or cakes of this insulating material in shapes and sizes which fit the standard tanks with a minimum of cutting. It should be remembered that it is extremely important that these insulating packages remain permanently dry, because any insulating material loses considerable of its insulating value when it becomes impregnated with moisture.

In building one of these insulated tanks the best procedure is to lay the floor of the tank first, placing in position the drain pipe together with the fittings for the overflow pipe. When this is completed the insulating material is put in position both on the floor and in the side walls, then outside and inside forms for the walls of the tank are put in place and both walls poured at the same time.

As the concrete walls approach completion, anchor bolts for the wooden frame around the top of the tank and for the angle iron corner protectors for the front of the tank are placed in the concrete while it is still soft. The cover for the tank is made of a wooden frame filled with insulating material and the under side of it at least should be covered with galvanized iron to keep the insulating material dry.

Drawing shows dimensions of milk cooling tank. CONVENIENT SIZES OF INSULATED TANKS Capacity of Tanks (8 Gal. Cans)

12	18	10'8"	12'4"
One milking in tank at a time	Two milkings in tank at a time	Inside Length	Overall Length
4	6	4'0"	5'8"
6	9	6'0"	7'8"
8	12	8'4"	10'0"
10	15	9'6"	11'2"

Smile of the Week--

A farmer's barn was burned and the agent for the insurance company duly turned up and told him that his firm would build another barn exactly like the destroyed one instead of paying the claim in cash.

The farmer was furious. "If that's the way your company does business," he roared, "you can just cancel the insurance on my wife!"

Helpful Hints

For added storage space under your kitchen sink, add narrow side shelves, racks on doors, hooks or sliding rods. Be careful not to make permanent installations that would interfere with plumbing repairing.

To wash corduroy clothes; use mild soap suds, put garments in machine and run five minutes. Rinse three times in lukewarm water. Never run through wringer but put directly into rinse water. Hang up dripping wet. Don't even wring by hand. Hang jumpers on wooden clothes hangers.

GEMS OF THOUGHT

BOOKS

Books are the quietest and most constant of friends; they are the most accessible and wisest of counselors, and the most patient of teachers.—Charles W. Elliot.

Be as careful of the books you read, as of the company you keep; for your habits and character will be as much influenced by the former as by the latter.—Paxton Hood.

Books are standing counselors and preachers, always at hand, and always disinterested; having this advantage over oral instructors, that they are ready to repeat their lesson as often as we please.—Chambers.

No book can be so good as to be profitable when negligently read.—Seneca.

The book to read is not the one which thinks for you, but the one which makes you think. No book in the world equals the Bible for that.—James McCosh.

The Bible is the learned man's masterpiece, the ignorant man's dictionary, the wise man's directory.—Mary Baker Eddy.

Easy To Knit

7092

Alice Brooks

At last! Knitting-lovers can make beautiful squares for bedspreads, scarfs, cloths! This beauty works up quickly, easily!

Square is 7 1/2 inches in heavy cotton. Knit on 4 needles. Pattern 7092 has knitting directions.

Our improved pattern—visual with easy-to-see charts and photos, and complete directions—makes needle-work easy.

Gypsum was used 4,000 years ago by the Egyptians as wall plaster.

OUR COMPLETE SHORT STORY—

Twin Beds, Please :: She Was Terrified Her Dad Would Give The Whole Thing Away.

By ROY V. PRICE

HE MOVED slowly through the scrubby pines back from the roadside, a tall, muscular man, well-dressed in city clothes. Carefully, he picked his way among the pines, avoiding the branches that reached out. He held the heavy automatic at his side, ready for use.

Minutes later, he saw a girl looking down at the flat tire on the wheel of a new station wagon.

He stepped out in front of her. "Keep quiet!" he said. "Do as you're told and you won't get hurt." He noticed that her skin was moist and that she was very pretty — about twenty.

"I have no money and this car belongs—"

"I don't want anything of yours!" His eyes slid over her shapely figure and returned to rest on her blue eyes.

She returned his look unflinchingly. "Well, what do you want?"

"All you have to do is act as my wife and get us into a cabin down the road at the Resthaven Motel. After I sleep a few hours, you can be on your way."

A dark shadow of fear came into her eyes. "I knew that article would cause trouble," she said.

"What article?" he interrupted.

"The one in the paper telling how the man who runs the Resthaven inherited twenty thousand dollars and letting people know that he keeps the money there because of a distrust for banks."

"So," he said smiling. "You know about that, too."

"I also know that you're a day-old fugitive from a chain gang."

He silently cursed himself for a fool. She couldn't be released. She must accompany him now, or...

They drove into the motel and stopped beside the office. He said, "Just one false move—"

As they approached the desk, she said, "Be sure to get one with twin beds, dear."

The white-haired head of the proprietor bobbed up. His horn-rimmed spectacles dropped down from his forehead and settled just below the bridge of his nose. His eyes were really bugged as he studied the girl and the man.

"Ain't no cabins here got twin beds!" he blurted, fumbling with the registration card. "But they all have showers. Right clean, too," he added proudly. "Mr. and Mrs. Barlow," he read aloud as the card was handed back. He glanced at them dubiously, then reached for a key. "Anything wrong?" the man asked sharply.

"Nope," said the proprietor. "Secure in the cabin, Barlow watched the old man hobble back across the court. Then he turned from the window, readjusted the automatic in his shoulder holster and faced the girl.

"You're smart," he said. "Very smart!"

Her eyes flashed scorn. "Save your compliments for somebody more deserving. City scum! You've only that old man's helplessness — and mine — to thank for being smart." Her words dripping sarcasm. "Also, your obvious efficiency with that delightful little toy you carry."

"Efficiency is the indispensable quality of a smart operator. One must sometimes be an efficient thief, sometimes an efficient killer, and there are times when efficiency," he paused as his eyes again flowed slowly over her body, "in other pursuits is essential."

"How touchingly modest!"

"Thank you. And the twenty thousand dollars will help us to start our new life in—Mexico—perhaps." As he looked at the lovely, defiant face, he felt a twinge of regret that it had to be this girl who had be-

CROCUSES COME—Spring has come to the West, as shown by this little tot, who picks a crocus that burst into flower during recent warm weather.—S.N.S. photo.

come inextricably entangled in his plans for freedom. She was high-spirited and courageous and he admired these qualities.

He stalked her around the room. "If you attract attention it might become necessary to exercise the talents you so deeply deplore!"

She was fighting desperately in his arms...

The door crashed inward under the impact of a powerful shoulder.

Barlow, releasing the girl, reached for his automatic, then raised his hands instead as he looked into the muzzles of the revolvers held by the two big highway patrolmen.

"Oh, Dad," the girl sobbed as she threw herself into the arms of the proprietor, "I was terrified you might give the whole thing away."

(Copyright Wheeler Newspaper Syndicate)

50 Million Bushels Wheat Must Reach Elevators By July 31

REGINA.—There still are approximately 50,000,000 bushels of wheat in store on the prairies to be delivered to country elevators before July 31, according to an estimate released here by W. C. McNamara, assistant chief commissioner of the Canadian wheat board.

He called upon western farmers to deliver as much of their grain as possible as soon as road conditions improve. The condition of the market at present, indicates that all grain delivered now can be disposed of by the board prior to the 1950 harvest. Prompt delivery by farmers would materially assist the board in disposing on the crop to the best advantage, he said.

B.C. POLICE DISAPPEARING

VANCOUVER.—The British Columbia provincial police, organized in 1858 and the oldest provincial force in Canada, soon will disappear. The province signed an agreement under which Royal Canadian Mounted Police will take over.

SELECTED RECIPES

UNCOOKED FONDANT

- 2 tablespoons butter
- 2 cups icing sugar
- 2 tablespoons evaporated milk

Melt butter over hot water; stir in icing sugar (reserving little to spread on board for kneading). Add milk, and desired flavoring. Knead until smooth. Color as desired, make into rolls, chill thoroughly and slice.

JELLY ROLL

- ¾ cup cake or pastry flour
- ¾ teaspoon baking powder
- ½ teaspoon salt
- 4 eggs
- ¾ cup fine granulated sugar
- 2 tablespoons melted butter

Sift and measure flour and sift again with baking powder and salt. Beat egg yolks until thick and lemon-colored; gradually beat in sugar, and continue beating until very thick and light. Fold in stiffly-beaten egg whites.

Sift and fold in dry ingredients, half at a time, then fold in vanilla and melted butter.

Turn into a shallow pan (16 by 10 inches), which has been greased and lined with paper to within ½ inch of edge, and grease again.

Bake at (400 deg. F.) for 14 minutes.

Turn out at once onto a damp towel, trim off crusts and spread with jelly quickly and wrap in towel. After a few minutes remove towel and allow jelly-roll to cool. Coat with sifted icing sugar if desired.

The Alaska highway cost \$133 million to build. 2877

Alberta Turns To Mustard Crop

LETHBRIDGE.—Fearing a world wheat surplus and lower prices, some southern Alberta farmers are turning to mustard seed this year as a substitute crop.

Contracts for growing commercial mustard seed on at least 15,000 acres now are being issued to dry-land farmers. They are promised a price of \$5.50 per hundredweight for No. 1 yellow mustard seed.

Introduced to southern Alberta from neighboring Montana about 15 years ago, mustard seed has become an important dry-land crop in regions south and east of Lethbridge.

"Buy Butter" Campaign Being Launched

OTTAWA.—Faced with huge butter and cheese surpluses and high milk production, the government launched a propaganda and advertising programme to increase Canadian consumption of dairy products.

The department of agriculture said the campaign would be conducted by its consumers section and other departmental agencies. The action meant resumption of former peacetime activities in getting Canadian people better acquainted with home-produced foods.

Super for Supper—made with MAGIC!

HOT BISCUIT SUPPER-SANDWICH

Season to taste 1 c. minced cooked meat with grated onion, salt, pepper and condiment sauce; moisten slightly with leftover gravy or cream sauce. Mix and sift twice, then sift into a bowl, 2 c. once-sifted pastry flour (or 1 ¾ c. once-sifted hard-wheat flour), 4 tps. Magic Baking Powder, ½ tsp. salt, ½ tsp. dry mustard. Cut in finely 5 tbs. chilled shortening. Make a well in dry ingredients and add ½ c. chili sauce and ½ c. milk; mix lightly with a fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on a lightly-floured board and divide dough into 2 equal portions. Pat one portion into a greased round 8½" cake pan and spread almost to edges with meat mixture; moisten edges of dough with water. Pat second portion of dough into an 8½" round and place over meat mixture; press lightly around edges to seal; score top layer deeply into 6 pie-shaped wedges. Bake in hot oven, 425°, about 20 mins. Serve hot with brown tomato sauce. Yield: 6 servings.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

**We're
Customers
Too!**

Everyone knows that Dominion Textile Company Limited sells fine cotton products.

But we buy things too. We're customers of other Canadians right across the country.

As a company we purchase lumber, paper, corn and potato starches, chemicals, transportation services and a hundred and one other items from different parts of Canada.

And the 12,500 employees in our plants, drawing among the highest textile wages in the world, spend many millions of dollars a year on flour from prairie wheat, meat from Alberta cattle, fish from both Atlantic and Pacific coasts, homes made with the use of B.C. lumber and outfitted with furnishings and appliances from all provinces and other goods and services provided by fellow-Canadians.
